If the camera glass got dirty, it will be difficult for the camera to focus. And in 3rd party app, focus will be not as good as in the camera app.

When taking pictures under the light, there will be some banding on the screen, we can make a anti-banding setting.

If you open the camera app and it shows camera error or it can not connect to the camera, you can reinstall the camera and make sure you get a correct version of camera when you want to buy one.

To reassemble your device, follow these instructions in reverse order.
